

Product Description

Our Adjustable Edge Grips are the perfect solution without the need to drill holes in your material. With a variety of different finishes in Stainless Steel and Aluminum, we are sure to have an Edge Grip that makes your project stand out. This line of edge grips will make your project shine with the ability to hang up anything up to 1/4".

Shown above in Aluminum Finish

How do they work?

They are designed for both pieces of the clips to wedge together and interlock, securing your panels in place.
