

Product Description

We have a four different options for slot mount hardware all shown below. This hardware will *hold panels made from acrylic, sintra and dibond* and are great for many types of installations.

Standard Slot Mount

This Outwater hardware allows for easy installation as it does not require drilling panels before mounting. *It holds panels up to 3/8" thick in any direction.* It is manufactured from an aluminum that will extend the life of each stand-off. It is available in a Matte Chrome finish and features a 1-1/4" diameter x 1-5/8" barrel length.

EZ Thru-Hole Gripper

This Gyford hardware is recommended for signage and smaller/lightweight artwork installations. *It holds panels ranging from 1/4" to 3/4" thick in any direction.* Panels mounted with this clip will need a 3/8" hole to allow a stud to pass through. Available in Satin Stainless finish.

EZ Panel Gripper with Mounting Plate

This Gyford hardware is recommended for larger panels that need extra support. *It holds panels ranging from 1/4" to 3/4" thick in any direction.* This assembly will require 3/8" holes in your material for the fastening stud and attaches with a 2-1/2" mounting plate. Available in Satin Stainless finish.

Panel Gripper with Mounting Plate

This Gyford standoff panel gripper has a slightly different shape. *It holds panels ranging from 1/4" to 1/2" thick in any direction.* The 2-1/2" mounting plate uses three #8 oval head screws (included) and panels can be mounted with or without 3/8" holes. Available in Satin Stainless finish.

**There are no hard & fast rules for weight limits, but we can make recommendations based on individual applications & surfaces.*
