

Product Description

Also referred to as a French cleat, Z-Clips are a popular choice for hanging large format projects. Since the clips can be removed and re-installed, they allow for a more ecologically friendly installation. **The most notable feature is that Z-clips are completely concealed after installation.**

What are they made of?

All of our Z-Clips are made of aluminum and are lightweight and durable.

How are they used?

Z-Clips are ideal for hanging biophilic artwork, wall panels, partitions, displays and signs.

How do they work?

They are designed for both pieces of the clips to wedge together and interlock, securing your panels in place. Because of the simple and easy installation, Z-clips allow for fast and easy future removal, dismounting, changing or replacing.
