

Acoustical Art Panels

Improve noise reduction while providing visual aesthetics in your space!

Olee Creative's digitally printed acoustical art panels improve noise reduction while providing a visual aesthetic. We will work with you to select the perfect images for your project from our extensive stock photo collection, or one of our featured photographers. Our acoustical art panels are 2" inch thick panels and offered in three standards sizes:

- 24" x 24" (weight 6 lbs)
- 24" x 36" (weight 9 lbs)
- 24" x 48" (weight 12 lbs)

Custom sizes up to 48" x 96". Our acoustical panels are also available in our traditional single, collage, triptych and quadriptych options. Designed for maximum sound absorption, Our panels maintain a Noise Reduction Coefficient (NRC) rating of .90, meaning 90% of the sound is absorbed by the panel over all frequencies the human ear can hear. We use Roxul AFB 2" panels in a frame, covered with printed fabric. Panels are mounted using a French Cleat-style Z-clip or a locking T clip for easy installation. In addition to easy installation, our artwork is NFPA 701 Fire Rated. These art panels are an easy and economical way to make your environment memorable while providing necessary acoustics.

Olee Creative's acoustical artwork is a great way for architects and interior designers to add functional and visual aesthetic appeal to their projects. This impressive art display allows the designer's creativity to shine while creating a comfortable and memorable space.
